Petition	
<p>Calls on the Director General to collaborate with Members and Commissions, especially in the Atlantic biogeographical region, to achieve greater awareness of biodiversity conservation, and, more</p>	

Con el apoyo:

specifically, the protection of biodiversity refuges. To provide technical and programmatic support to promote and strengthen existing initiatives and to share information on their conservation; and urge the European member states, and Spain in particular, as well as their regional governments, to promote effective measures to protect these areas, through the identification of such areas and the subsequent drawing up of management plans, or to reflect the importance of biodiversity refuges within existing management plans. Also, Encourages all Members and the Spanish administrations with competence in this field to cooperate and increase the efforts made to identify, protect and conserve these areas of special importance for conservation, as well as to collaborate in the transfer of information on biodiversity within the Spanish Atlantic region to the managers of this land and to the scientific community; and urges the European Union and its Member States to provide funds for the identification and protection of these biodiversity refuge areas in the Spanish Atlantic region and for the analysis of their sensitivity to climate change, studying the effects of the latter on these areas of importance for biodiversity conservation within the Spanish Atlantic region.

State	Fulfilment in Spain
Active	In process

Summary of actions carried out with effect in Spain

[Compilation and identification of ecological restoration actions in Spanish wetlands](#) (2016). It Includes wetlands in the Atlantic region.

[Proposal for the inclusion of the Maritime-Terrestrial National Park of the Atlantic Islands of Galicia in the List of Wetlands of International Importance \(Ramsar Convention\)](#). (2016)

CONAMA Report "[Protection of Biodiversity Refuge Areas in the Atlantic Biogeographic Region](#)" (2016)

[Initial strategic document of the Regional Land Management Plan \(PROT\)](#). (2016)

[Diagnosis of the Natural Heritage of the Basque Country 2016. Biodiversity Strategy of the Basque Country 2030](#). (2016)

Peatland habitats in the Natura 2000 network. Diagnosis and criteria for their conservation and management in the Atlantic Biogeographic Region. (2017)

[Diagnosis of biodiversity in the municipality of Bilbao](#). (2017)

[Special Plan for the Protection of Green Infrastructure and Biodiversity in Salamanca \(PEPIVB\)](#) (2017

[Strategic Plan for Natural Heritage and Biodiversity \(2017-2020\)](#). It includes aspects of the bioconservation of the Atlantic area, such as:

- [OSPAR Convention on the Protection of the Marine Environment of the North-East Atlantic](#).
- [Agreement on the Conservation of Cetaceans of the Black Sea, Mediterranean Sea and Neighbouring Atlantic Area \(ACCOMBAMS\)](#)
- [Agreement on the Conservation of Albatrosses and Petrels \(ACAP\)](#)

Project [CONVIVE LIFE+](#). Research project financed by the European Union which tackles the problem of integrating human activities into the conservation objectives of the Natura 2000 Network in the estuaries of Cantabria, through the implementation of environmental restoration and public awareness actions. In its fourth action: [Biodiversity Management Plan for the Victoria Marshes](#) (2018).

[LIFE+ARCOS](#) Project. (2018) This is a project which is being developed on the Cantabrian coast and in which three Autonomous Communities are involved: the Principality of Asturias, Cantabria and the Basque Country. The aim of this project is to contribute to achieving a favourable status for different dune systems on the Spanish Atlantic coast, through the development of coordinated actions between different public administration agents with responsibility and competence in the management of the natural environment, research centres and the private sector.

[Modification of the consolidated text of the Gozón GMP within the scope of the UA-I-LU-4](#). (2018)

[According to the Commission Decision \(EU\) 2018/40](#) of 12 December 2017, which adopts the eleventh
