Petition	
<p>Urges the countries of the Mediterranean to: coordinate actions to facilitate the culture of change within the fishing sector, encouraging sustainable development, promoting the importance of marine protected areas and following a participatory philosophy and methodology; recognize the value of traditional ecological knowledge that the artisanal fishing sector possesses and generate mechanisms and alliances that allow it to be systematized and transferred to both the scientific community and the rest of society; to promote that the organizations of artisanal fishermen in the Mediterranean play an active role in the decision making on the design and implementation of the marine protected areas, in the sustainable management of the marine resources and, in short, to lead the movement for the</p>
